## Cubicles

Kupan cubicles are designed for intensive use in demanding environments such as educational establishments, swimming pools, industry, recreation centres, sports facilities, airports and utility projects.

The innovative solutions aimed at safety, limited maintenance and design are highly regarded internationally.

The best achievable quality is guaranteed by high levels of automation. Bespoke products are considered standard and offer solutions for practically all constructional and/or aesthetic requirements.

In a number of product lines (Essence, Excellent and Comby) options are available in line with the design and available budget.

Along with the wide choice of colours you can have your project fully matching your house style or ensuring the look you require.

This may involve dressing, toilet, shower, washing or changing cubicles, with provisions such as benches, splash walls or central locking. Or cubicles with rebated and invisible hinges and special fittings. The Kupan cubicle range offers you perfect solutions of the highest conceivable quality for many years of pleasant use.

Besides the information in this brochure, comprehensive technical product information is available from the download centre on our web site [www.kupan.com](http://www.kupan.com).

**Essence** unique and innovative

## Essence, the safe, stylish, durable and innovative cubicle concept

Stylish design, high quality and safe: Words that perfectly describe the Kupan Essence Line. The Essence Line is an innovative cubicle concept with a completely safe hinge, making it impossible for fingers to be trapped between hinge and door. The unique aspect of this concept developed by Kupan is the patented, sliding, 180 degrees turning and maintenance-free hinge.

During the development phase the hinge was tested more than a million time on an opening and closing door. This is equal to 25 years of being used 100 times a day. A new leg was also developed to match the style of this concept.

The attractive styling, colour scheme options and finish with rounded soft line aluminium profiles make an impression in any situation.

**Excellent** perfect finish

## Excellent, soft line or slim line for a style that makes an impression

Attractive profiles either as soft line with a soft rubber stopper or slim line in a wall type allow for an extra stable construction and the use of attractive door fittings. These are characteristic properties of the Excellent Line cubicles.

The cubicles are constructed from water-resistant honeycomb with 2.5 mm HPL (High Pressure Laminate) melamine resin plates on both sides and a strong polystyrene edge finish. The advantage of this sandwich construction is the extreme strength and ability to make extra stable constructions. For the hinges you can choose between the standard Flexible Step loose-joint hinges (adjustable opening angle) or the Slim Line hinges.

The assembly options are practically limitless: on legs, free-hanging constructions, floor and/or ceiling connection, it's up to you to choose. Together with an extensive range of accessories the Excellent Line cubicles can be given the desired identity.

**HOTELS**

**SCHOOLS - UNIVERSITIES**

**THEATRES/CINEMAS**

**AIRPORTS**

**STADIA**

For technical information please download PDF at [www.kupan.com](http://www.kupan.com)

**Comby** durable and flexible system

## Comby, economic and robust as Essence flexible as Excellent

An attractive flat front, very robust and extremely flexible construction forms; core values applicable to the Comby Line cubicles.

As the name already says, the construction of the 'Comby Line' is a combination of 13mm solid HPL doors and partitions with 30mm sandwich end walls. This enables the building of highly stable cubicles with flat front or a variety of alternative constructions.

The Comby Line series is usually used if there is a requirement for a 'free-hanging' construction, if a flat front is required with rubber protective profiles and ... for anyone who wants to be surprised by the price.

The Comby Line stands out by the combination of two wall types for attractive colour combinations to give the construction a particularly attractive look.

# Cabine special projects

## Special projects

Special constructions or specifications can also give your project a special look

# Lockers

Kupan lockers have a number of unique properties. Recessed doors make the lockers highly secure and give an attractive flat front. The maintenance-free, self-closing hinge system is a technical 'tour de force' and an example of Kupan innovation. Bespoke products make Kupan lockers simple to incorporate in any interior construction.

The lockers are supplied pre-assembled so the time needed for installation is minimal with a maximum of stability. You can choose from various skirting systems, top panels, mechanical locks, coin-operated locks, individual electronic locks or system locks of various makes. With the choice of colours, engraving options and handles you can give the lockers their own identity based on comfort and design that is consistent with your house style or the appearance required.

Areas of application include:

**SWIMMING POOLS**

**WELLNESS AND FITNESS CENTRES**

**SCHOOLS**

**OFFICES AND HOTELS**

**HOSPITALS - REHABILITATION CENTRES**

**SPORTS FACILITIES**

**AIRPORTS**

**RECREATION/LEISURE PARKS**

## Tailor made and unique features

Besides the above locker models, tailor made solutions are a Kupan specialty. Deviate sizes, body's in color, top panels, several closing methods including electronic, various types of plinths and ventilation facilities are some examples.

**ANTI BREAK-IN DESIGN BY INLAYING DOORS**

**SELF CLOSING DOORS, BY A UNIQUE MAINTENANCE-FREE HINGE**

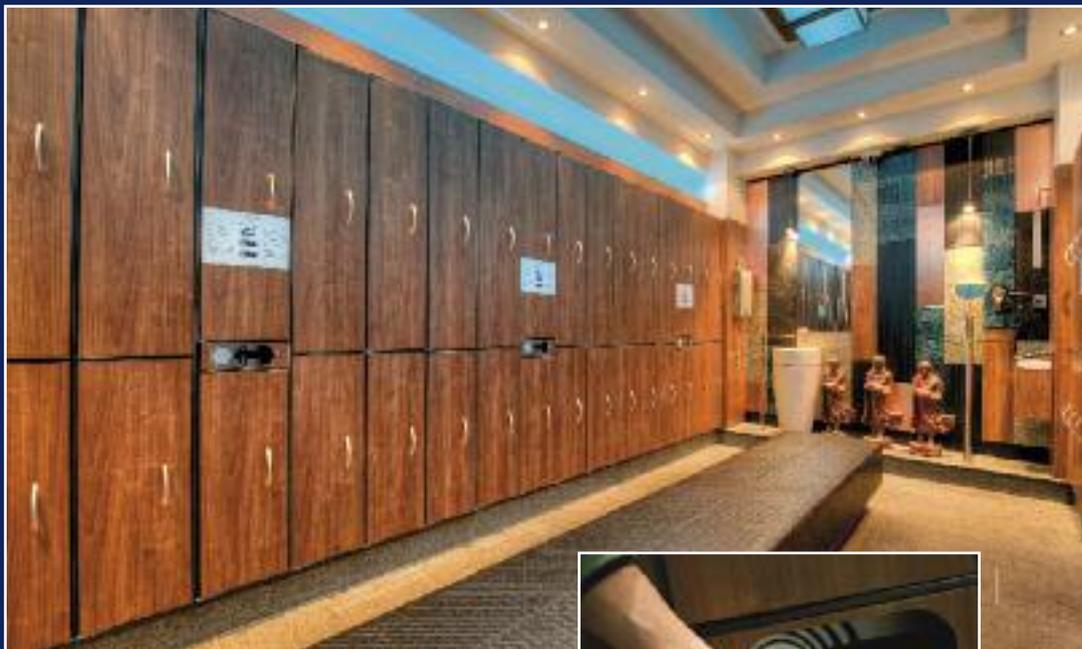

**VERY STABLE, STRONG AND FLAT DESIGN**

**DELIVERY OF PRE-ASSEMBLED BLOCKS, MAKING A VERY SHORT INSTALLATION TIME**

## Washing and make-up stations

Kupan offers three series of washing and make-up stations.

The Amsterdam Line is a tablet type fully constructed from 13mm HPL. An attractive, low-budget, no-nonsense product that can be provided with a stainless steel water seal if required.

The Vienna Line is a concept with integrated water seal in the attractive stainless steel edge finish.

The Copenhagen Line stands out because of its exclusive look. The stainless steel soft line edge finish gives this tablet, the seating cubes or benches a special appearance.

# Doors

Kupan doors are designed for use in demanding and/or specific environments. Each door can be fabricated with properties, such as water-resistant, heavy duty, non-fire supporting and non-organic for certain market segments. All types are extremely high quality, lightweight, and durability as standard and are available as bespoke products. All doors are provided with reinforcement for a door spring and keyhole as standard.

Flat or rebated design provided with windows, drop seals, preparation for electrical locks, kick plates and fittings. All of this makes it possible to create the perfect door for your specific application.

Available as a swing door or sliding door.

# Benches

FREE-STANDING, WALL ASSEMBLY OR SEMI-WALL ASSEMBLY

COMPLETE RANGE

UNIQUE CONSTRUCTIONS

ATTRACTIVE STYLE

EXTREMELY HIGH QUALITY

Kupan Calibre Line benches complete the range.

The range of benches is designed in co-operation with Europe's leading supplier of benches and cloakroom systems, AJ Binns in England.

Specific properties are the unique constructions including for floor assembly, wall suspension and anti-hinge movement.

Obviously the range is extended and completed with free-standing benches, wall assembly or semi-wall assembly depending on the wall type.

Cloakroom rails in combination with benches or for individual assembly are also available.

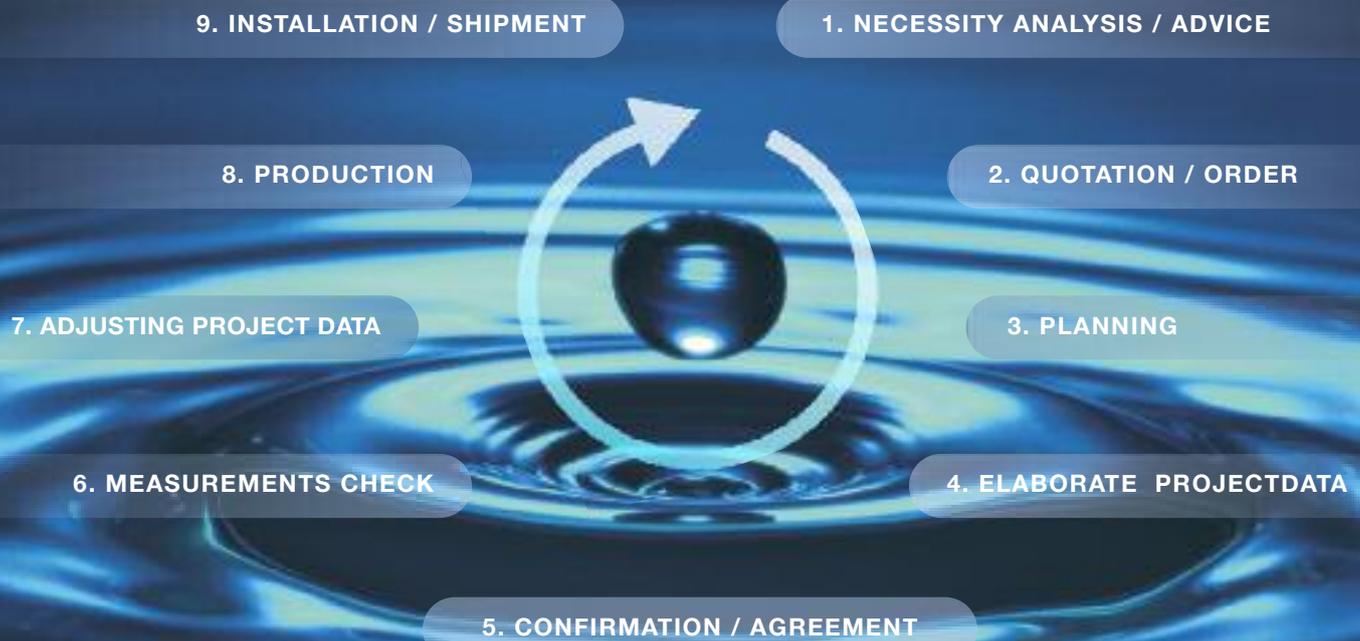

A separate brochure for the Calibre Line benches is available
