

# Solid Colours

Colours shown are an indication and may vary as a result of your screen settings. The NCS codes stated are the closest matching to the colours shown. The colours are not UV tolerant and could discolour if subject to direct sunlight.

Light colours often give a feeling of space and are less susceptible to scratching or showing finger prints.

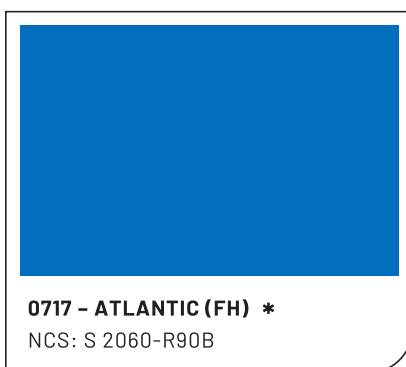

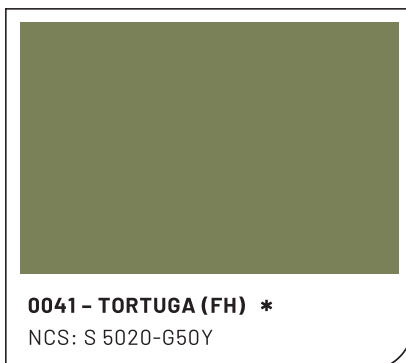

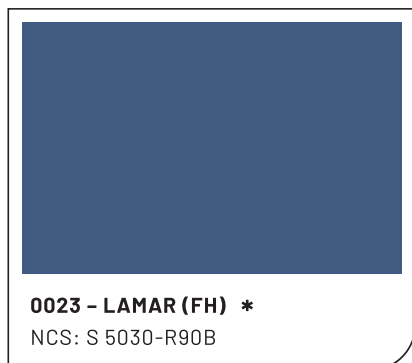

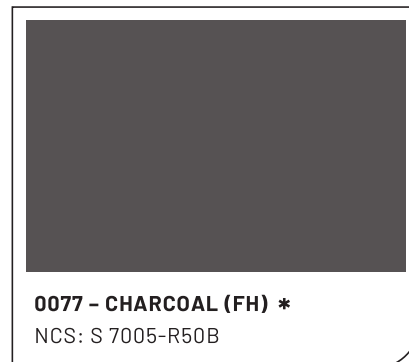

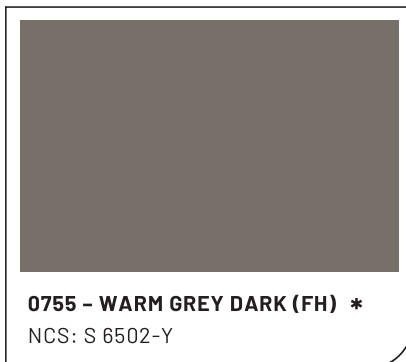

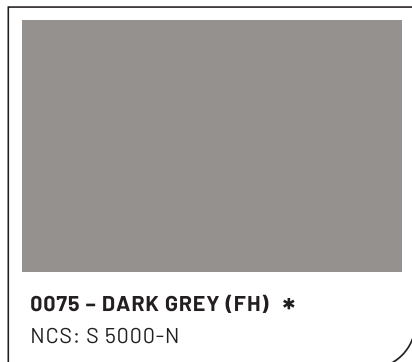

Colours samples available upon request.

Colours shown are an indication and may vary as a result of your screen settings. The NCS codes stated are the closest matching to the colours shown. The colours are not UV tolerant and could discolour if subject to direct sunlight. Light colours often give a feeling of space and are less susceptible to scratching or showing finger prints.

Where the \* is shown against the colour a small material increase will occur due to the addition of a protection foil added to the material.

Colours samples available upon request.
